COLLECTION 2026

Quality product of UNILIN

WHY YOUR HOME NEEDS SOME VITALITY?

TIMELESS STYLE

Bring your interior to life with elegant designs in intense colours – from soft light tones to deep, dark shades.

The matt finish and realistic structures enhance the planks natural appearance. Structures are available in Natural touch (embossed) and True to nature (embossed in register) for an authentic wood look and feel you can see and touch.

LASTING PERFORMANCE

Vitality floors are built to last. The top layer offers outstanding resistance to scratches, stains and UV light. Enjoy beautiful floors that stay colour-true, year after year.

PROTECTED AGAINST SPILLS

Thanks to the unique Aqua Protect coating technology, your laminate floor is completely water resistant. Vitality is the perfect flooring solution for all areas in your home, including kitchens and bathrooms.

QUICK & EASY TO INSTALL

Featuring the trusted Uniclic system, Vitality floors are quick and easy to install. The strong locking mechanism ensures a seamless fit between planks, creating a stable and durable floor you can rely on.

ANTI-STATIC

Vitality floors are treated with a permanent anti-static finish that prevents the build-up of static electricity, even in dry conditions. As a result, dust and dirt are less likely to stick to the surface, making cleaning faster and easier.

Vitality floors are made in Belgium, using the best raw materials and sustainable production processes. They carry several quality labels.

Designed in Belgium

EU ECOLABEL
UNILIN was the first to receive the European Ecolabel for laminate flooring. The EU Ecolabel is a label of environmental excellence that is awarded to products and services meeting high environmental standards throughout their lifecycle.

PEFC
Vitality is friends with the environment. All Vitality laminate floors carry the PEFC label, which is your guarantee of responsible forestry management and conservation.

A+
The results of the VOC emissions are globalised and expressed in a 4-class scale from A+ (very low emissions) to C (high level of emissions). Vitality has successfully passed the test and has obtained an A+ score.

CE / UKCA
CE is a certification mark that indicates conformity with health, safety and environmental protection standards for products sold within the European Economic Area. For our laminate sold in the United Kingdom, we have the UKCA label.

*Clickable skirtings

Our new clickable skirtings are developed to make installing smoother and the finish seamless.

Easy to install

Thanks to our internally developed Uniclic® system skirting installation has never been easier and quicker. No tools needed, just click and go.

Seamless finish

The ingenious design ensures the joints of your skirtings will meet seamlessly without any unsightly gaps.

Watertight Finish

Prevent moisture from seeping below the floor at the edges by using the Foamstrip and the SmartFinish AquaProtect kit. This ensures a watertight sealing of expansion gaps along walls, radiator pipes and profiles.

1. **Foamstrip**
   NEFOAMSTRIP20 - 20 × 1 m × Ø 10 mm
   Elastic strip to install in gaps around the floor perimeter.
2. **SmartFinish AquaProtect kit**
   SFKITTRANSP – 310 ml
   Transparent silicone to apply on top of the Foamstrip and to seal skirtings and profiles.

Profiles

Colour-matched profiles

High-quality profile with 4 applications in 1 single product. Simply cut the Incizo basic profile to the desired shape with the supplied Incizo knife. Available in matching designs for all Vitality floors.
